

Military Equipment Market Overview

AUTO BOLT

The military vehicle market is forecasted to reach \$27.6 billion by 2022. The global aerospace and defense industry itself is positioned for global growth, the United States largely leads the way. Defense budgets are growing as geopolitical risks increase worldwide.¹ Manufacturers in this market continue putting pressure on suppliers to reduce costs and increase production rates.

The military ground vehicle segment is comprised of military armored vehicles including armored personnel carriers, infantry fighting vehicles, mine protected vehicles, light armored vehicles, armored combat support vehicles, light utility vehicles, anti-aircraft movers and trucks; military battle tanks including combat tanks such as flame tanks and main battle tanks; and unmanned ground vehicles that are designed to operate dangerous or impossible human operations.²

Major manufacturers in the military vehicle market include Lockheed Martin, Boeing Co., BAE Systems, Raytheon Co., General Dynamics Corp., Rheinmetall AG and Oshkosh Corp.³

Auto Bolt for Military

Auto Bolt's technical expertise and long history can help them win when it comes to the military equipment market. Other areas of opportunity include:

- Made in USA is important for manufacturers with government contracts; Auto Bolt's military-spec fasteners are fully traceable and DFAR compliant
- Defense Logistics Agency QSLM for Class 2 and Class 3 certified and able to supply B1821BH requirements
- Consistent on-time delivery helps equipment makers stay on schedule
- Although price may not always be a point when Auto Bolt beats out competition in this market, responsiveness to RFPs and overall fair pricing can be an advantage

About Auto Bolt

Auto Bolt is a proud American cold-heading bolt manufacturer with more than 70 years of experience in quality bolt-making. All Auto Bolt products are Made in America in a state-of-the-art facility in Cleveland, Ohio.

Auto Bolt offers more than just a price point, they are a partner who provides a customized approach starting with quick, accurate quoting and carrying through to CAD drawings, die design and delivery. They work both directly with customers and distributor partners. They specialize in custom solutions rather than one-size-fits all products.
