

Truck Trailer and Heavy Equipment, and Suspension Market Overview

AUTO BOLT

Research indicates that the truck and trailer and heavy equipment industries are heading for a market correction in 2020, however the U.S. market is expected to see little change outside of trade and tariff concerns. The U.S. consumer is the key driver for the mid-term outlook on this market.¹ Higher competition among manufacturers in the market will put downward pressure on prices and federal contracts remain strong for manufacturers.²

Recent trends towards comfort and safety concerns as well as advanced technologies are also driving factors for the suspension section of this market.³

Players in these markets include Hendrickson, Rassini Suspensions, MGM Brakes, Hutchens Industries, and Great Dane among others.

Auto Bolt for Truck Trailer, Heavy Equipment, and Suspension

Auto Bolt manufactures high-quality industrial fasteners used in a broad range of equipment, ranging from truck trailers to earth movers and heavy construction equipment. Customers can call on Auto Bolt for assistance in manufacturing their fastener products with fast, accurate quote turnaround, competitive pricing and proactive communication throughout the process.
