

# AUTO BOLT USA

## BLENDING DOMESTIC COSTS WITH YOUR IMPORTED FASTENERS

Global supply chain disruptions continue to affect many companies that currently import products from Asia. Are disruptions causing you to adjust your supply chain strategy now and into the future?

A proactive strategy is to use a high-quality, on-time domestic supplier. This helps to blend your import costs and assures your customers receive their products when they are needed, without expediting them or experiencing a logistical nightmare.

Blended pricing works by dual-sourcing a product from an approved domestic supplier, in addition to the international supplier you use. This gives your customers a domestic option, which allows for continued supply.

Auto Bolt understands your need to remain competitive globally. By placing 25% to 35% of your estimated annual usage with Auto Bolt, you will achieve a cost-blend pricing advantage while minimizing the overall impact of supply chain disruptions.

*Isn't it time you rethink your sourcing strategies and partner with a solid domestic company like Auto Bolt?*

### AUTO BOLT'S DOMESTIC MANUFACTURING ADVANTAGES

- *An in-house engineering team that listens to our customers' needs and offers extensive fastener knowledge from initial design to finished product*
- *Much quicker lead times when compared to importing products*
- *Products are produced in the USA. This helps customers save on their freight costs, including inbound logistics and duty costs*

### ABOUT AUTO BOLT

Auto Bolt is a proud American cold-heading bolt manufacturer with more than 70 years of experience in quality bolt-making. All Auto Bolt products are Made in America in a state-of-the-art facility in Cleveland, Ohio.

Auto Bolt offers more than just a price point. We are your **PARTNER** who provides a customized approach, starting with quick, accurate quoting and carrying through to CAD drawings, die design and delivery.

**We specialize in custom solutions rather than one-size-fits all products.**
